

# How do you start-up, manage and grow a successful business?

At Project Discovery we believe the key lies in strengthening the connections between people-your people-through experiential **High Performance Leadership Training**. Our active, solution-focused program incorporates many business team tools crucial to your company's success including: cooperation, communication, collaboration, coordination, relational leadership, effective problem-solving, imagineering, decision-making and perhaps most importantly, a willingness to manage the change process and take some risks.

Tired of wasting your own and your staff's time and money at conferences, workshops or with consultants resulting in few substantive changes back in the workplace? We're tired too. That's why we designed our Corporate Program to be active, solution-focused and to dovetail into your specific business environment. Mentally checked out? Bored? Material irrelevant? Close to impossible in our program.

That's right, this program is not for the lighthearted. In a Project Discovery Corporate Program everyone risks, everyone practices and refines their leadership skills, everyone participates, everyone breaks out of the box, and everyone promotes positive change. In short, everyone wins, management, staff and customers alike.

There has never been a time where keeping up with technology, with your market and with your staff has been more important. Managing the change process has become paramount in almost all business sectors.

You want to increase productivity, lower stress, effectively use your resources, increase your customers satisfaction and ultimately, improve the bottom line. We can help. How do we do it?

On-site workshops at your business, conference or meeting or even better, at our retreat facility at Skytavern Lodge, high above Reno in the Sierra's on the Mt. Rose Hwy only 20 minutes from the airport.

**High Performance Leadership Training**
